

Dąbrowa Górnicza, 2017-03-08

Dear Sirs,

We kindly inform you that as of 1 January 2017 a new name **PLANILAQUE COLOR-IT** is introduced for the entire range of lacquered glass products. The change of the name is dictated by the need to standardise the nomenclature all over Europe and will be gradually implemented this year. So far, two different names of lacquered glass products were used on different markets. For example, in Poland it was SGG PLANILAQUE EVOLUTION, and in France SGG DECOLAQUE.

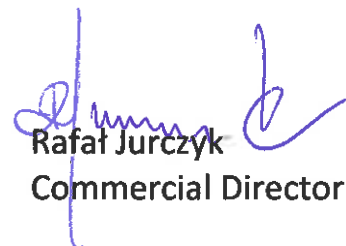

We are convinced that this decision will strengthen our communication and make it more uniform, and consequently will increase our Customers' comfort while looking for the lacquered glass they need in our offer.

Simultaneously, we would like to emphasise that the technical parameters and the specification of the glass stay the same. **PLANILAQUE COLOR-IT** is lacquered glass which obtains its rich colour thanks to applying highly resistant lacquer on the back surface, and then hardening it in high temperatures. It has a vast array of possible applications in designing walls and furniture – light enhances its colours, which has its effect on the illumination of the interiors. Increased humidity resistance of **PLANILAQUE COLOR-IT** makes this glass a perfect choice for bathrooms and kitchens, as well.

Detailed information on **PLANILAQUE COLOR-IT** can be provided by your customer service consultants and is available on the website www.saint-gobain-glass.pl
